

Don't Forget the Home Folks

Whether away at college, on a vacation or business trip, the home folks will want to know how everything is going.

Imagine the tingling surprise of the folks at home at suddenly receiving your long distance greeting and the pleasure you will take in hearing their voices.

Wherever you are, drop into your home and place of business for a few minutes each day over "Long Distance."

Rates are about half for station-to-station calls from 8:30 p. m. to midnight; about one-fourth from midnight to 4:30 a. m.

STATE FIRE MARSHAL HARTFORD TELLS OF SOME THINGS WE SHOULD KNOW.

In a recent bulletin issued by the Division of Fire Prevention of the Department of Trade and Commerce of the State of Nebraska, State Fire Marshal C. E. Hartford says that everybody, in order to prevent fires and conserve life and property, should know:

That fire is a treacherous servant and a most cruel master.

That fire hazards exist on every hand.

That the only way to get cheaper fire insurance in Nebraska is to stop burning property.

That a fire occurs somewhere in this country every minute that your clock registers a minute. That five schoolhouses and colleges burn every day in the United States.

That working along fire prevention lines can do but little without community co-operation. Are you doing your share in the conservation of life and property in your community?

Do you realize that the fire losses in the country represent a fire tax each year of approximately three dollars per capita for every man, woman and child?

At an average of five hours each day during 200 days in each year, twenty-five million children are in the schools of the United States. The attendance is compulsory. No fundamental education problem is greater than the safety of the children. Statistics available show there are five schools that burn every day.

Fire is one of the worst perils that confronts any community and good citizenship demands that each individual do his part to prevent waste by fire. Can we have your assistance?

An insurance company is merely a clearing house and collects money from the many for distribution to the few who suffer loss by fire. If the destruction of property can be reduced, the fire premiums should be proportionately reduced which will result in a large saving to the citizens of the state.

Mrs. Hahn returned to her home in Ogallala Wednesday after taking treatment in the General hospital.

AN EXPRESSION FROM THE SOUTH SIDE REGARDING THE RIVER BRIDGE.

The following communication to the Tribune is worthy of careful consideration:

I have talked with many South Side farmers regarding the bridge problem. I believe the following statements sum up their settled opinions regarding the main points at issue:

1st. A temporary way should be provided as quickly as possible for wagon and auto traffic across the river.

2nd. A committee of engineers should make a thorough investigation of the conditions which resulted in the destruction of the bridge as state to the public whether the bridge was constructed according to plans and specifications.

3rd. Bond will not again be voted for an indefinite something. They will be voted only for a bridge of certain specified dimensions and construction.

4th. Bonds will not be voted for a culvert over the South Platte.

5th. Bonds will not be voted for a foot bridge over the South Platte.

6th. The part of the concrete bridge now standing should be junked and a real bridge constructed.

W. P. SNYDER.

YEOMAN LODGE HELD HARD TIME SOCIAL LAST EVENING IN THE K. C. HALL.

Members of the Yeoman lodge enjoyed a hard time social last evening. All who attended in any clothing except overalls or aprons were charged the fee of fifty cents. The evening was spent in dancing after which refreshments were served.

Polarine's double duty

—and twin economies

Lubricating oil must do two things—enable the engine to deliver maximum power—protect every bearing and engaging part against wear.

The quick, complete combustion of fuel generates maximum power. But it requires a gas-tight oil seal between piston rings and cylinder walls to hold this power to its work.

And to get maximum work every bearing and engaging part must offer the least possible resistance to movement—must stay in perfect fit and alignment, cushioned against wear and friction by a protective oil film.

Polarine meets every requirement. It maintains its body and its lubricating qualities, practically unchanged, under all weather and operating conditions. It assures full compression and power—gets the biggest mileage out of every gallon of gasoline. It keeps down wear, prevents vibration, breakage and big overhauling and repair expense.

Polarine is made in four grades—light, medium heavy, heavy and extra heavy—but only one quality. Get the proper grade for your car next time you buy clean-burning Red Crown Gasoline—and you will start cutting down motoring costs.

SCIENTIFIC HEATING FOR YOUR HOME

CALORIC PIPELESS FURNACE

When you buy a Caloric you get more than the best heating plant that modern Science can produce. You get scientific installation—the free service of experienced engineers who personally plan the Caloric installation in your building.

Caloric engineering is one of the vital factors in Caloric success—on the certainty of this service to insure complete satisfaction is based the Caloric Money-back Guarantee.

Caloric Engineering Service is supplied by the manufacturer through this Caloric agency—to quickly assist you in planning the most efficient heating for your home. Let us make a sketch of your building—or bring a rough sketch of your floor plans to our store—and we will secure the Caloric engineer's installation plans without obligating you in any way.

Get these plans now and learn how the Caloric will save hundreds of dollars in building a new home and how it will pay for itself in fuel saving in any home, old or new.

Beware of the advice of those who depreciate the importance of proper engineering in installing any heating plant.

Simon Bros., Dealers.
